

# ants and flies

Ants are very annoying animals. They just bite you if you annoy them. I have been bitten lots of times.

Before I was 10 I thought that they are monsters but they are kind of creature it lives in wet moist areas they hunt in large groups they take them out by supriys and when they bite us we get very itchy.

This is a ant nest it cold go Down 5 meters deep the. Queen is in the middle of the nest the worker ant gets the food from around the area. The nest will get under attack atleast 20 times each day . The queen needs the workers but she needs well trained soldiers to protect the nest at all costs.

This nest is all over this tree.

Wasps are visas crashers when they sting it harts like mad so I worn you to not to

Touch it so when you se a wasp nest you will be sath from getting stung.

If you look at that picture at the top you can see the fetchers what makes this a bad to mess with.
